WORK EXPERIENCE

Elevation Energy Group, Austin, Texas

06/2016 – 11/2017

Lead Software Engineer

- Created supporting documentation, such as metadata and diagrams of entity relationships, business processes, and process flow.
- Designed databases to support business applications, ensuring system scalability, security, performance and reliability.
- Developed and maintained standards, such as organization, structure, nomenclature, data architectures, models, tools, and databases.
- Designed and implement comprehensive data warehouse systems to balance optimization of data access with batch loading and resource utilization factors.
- Developed data warehouse process models, including sourcing, loading, transformation, and extraction (ETL).

Bankrate, Austin, Texas

11/2015 – 06/2016

Lead Software Engineer

- Developed and designed WordPress theme and several plugins for our biggest WordPress site "The Points Guy".
- Increased data collection accuracy by 95 percent using our WordPress plugin (4.7 million unique monthly).
- Developed and updated project plans such as project objectives, technologies, and schedules.
- Monitored and tracked project milestones and deliverables.
- Submitted project deliverables, ensuring adherence to quality standards.
- Assigned duties and responsibilities to project team members.

Bankrate, Austin, Texas

04/2014 – 11/2015

Lead Software Engineer

- Led a full-stack team of three engineers who fixed any critical and/or time-sensitive issue in production.
- Trained, guided and mentored new hires and junior/mid developers.
- Implemented minor enhancements and special requests that would normally be covered by the dedicated team but would cause a major disruption.
- Fixed any critical issues that arise for products in the sustaining mode.

Bankrate, Austin, Texas

01/2013 – 04/2014

Software Engineer

- Developed and maintained several internal and external web applications.
 - Developed and maintained complex WordPress based applications.
 - Designed and developed integration solutions with multiple APIs and third-party applications.
 - Designed and developed software module using C# to migrate data from MsSQL to MySQL databases.
-

FlexOffers, Miami, Florida

01/2011 – 01/2013

Software Engineer

- Designed and developed several WordPress themes, child themes and plugins.
 - Installed, configured, and maintained dedicated web servers and shared hosting environments.
 - Worked on team to improve systems efficiency, to increase lifespan and to decrease costs.
 - Responsible for defining and documenting secure coding practices.
-

ShopLatinoTV, Miami, Florida

01/2008 – 01/2011

Senior System Administrator

- Maintained and administered computer networks and related computing environments including computer hardware, systems software, applications software, and all configurations.
 - Developed plans to safeguard computer files against accidental or unauthorized modification, destruction, or disclosure and to meet emergency data processing needs.
 - Trained users and promoted security awareness to ensure system security and to improve server and network efficiency.
 - Coordinated implementation of computer system plan with establishment personnel and outside vendors.
 - Screened systems for intrusions or denial of service attacks and reported security breaches to appropriate personnel.
 - Administered internet or intranet infrastructure, including Web, file, and mail servers.
 - Implemented updates, upgrades, and patches in a timely manner to limit loss of service.
 - Performed data backups and disaster recovery operations.
-

EDUCATION

Florida International University, Miami, Florida

Bachelor of Science - Computer Engineering

Miami Dade College, Miami, Florida

Associate of Arts - Computer Engineering

2009

Associate of Science - Computer Programming

2008
